ASR_design philosophy

Owner Friedrich Schaefer

ASR Audiosystems have been successfully building amplifiers since 1980. Friedrich Schaefer, owner and head of development at ASR Audiosystems, has a very definite idea of how an amplifier should sound: the musical reproduction should be homogeneous and natural.

ASR Audiosystems has only one goal: combining the harmony and musicality of a superb tube amplifier with the precision and superior power of a modern transistor amplifier.

SR Emitter I

ASR_emitter I

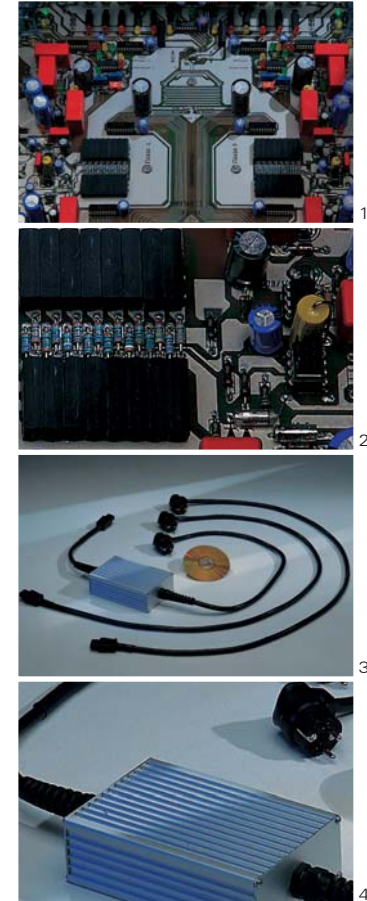

Music.
*at its most realistic and thrilling
when reproduced by an ASR emitter I.
forget about electronics and enjoy the music!*

The ASR Emitter I is the entry-level model of the high-quality ASR amplifiers.

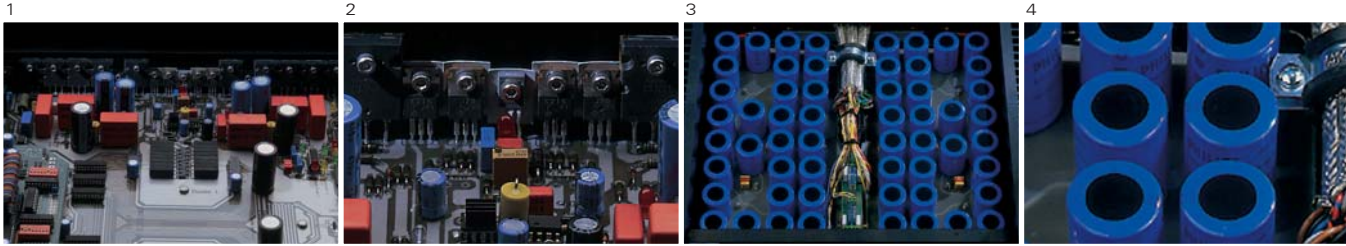

The parts used are of the highest available quality. The ASR Emitter I features: six line inputs, high-quality acrylic glass case with aluminium heatsinks, silver internal-wiring, remote control for all amplifier functions and many others. The sound quality is extraordinary: alive, detailed with a great sense of depth, and huge dynamic reserves.

The ASR Emitter I features a separate power supply. As an optional extra, it can be equipped with the ASR battery power supply to power the input stages.

Every ASR Emitter I can be individually ordered in different versions, with custom-built optional features or as a basic power amplifier.

- 1_High-quality mainboard
- 2_Remote volume cord
- 3_ASR powercontrol
- 4_ASR active powercord

Emotion.
conveyed through music.
performance – the ASR emitter II – incredibly real.

The ASR Emitter II is one of the rare modern classics in the art of building amplifiers. Continuously refined and improved for the last 15 years, the ASR Emitter II offers very high power output and sound quality standards, comparable with the very best separate components. The ASR Emitter II sounds very musical, open, detailed, natural and has enough stable power to drive even the most difficult loudspeakers easily.

The ASR Emitter II features two separate power supplies. As an optional extra, it can be equipped with the ASR battery power supply to power the input stages. Every ASR Emitter II can be individually ordered in different versions, with custom-built optional features or as a basic power amplifier.

Vinyl records.
*still regarded as the best medium in music reproduction.
played on a high-quality turntable and reproduced by an
ASR phono-preamplifier – an unforgettable experience.*

The ASR Plug-In Phonoboard

The ASR Plug-In Phonoboard was developed exclusively for the ASR Emitter integrated amplifiers. The adjustments for either MM or MC cartridges can be made via six DIP switches per channel.

ASR Plug-In Phonoboard

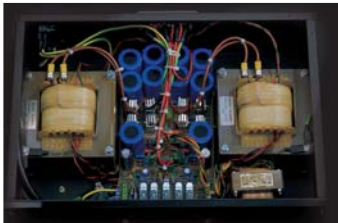

The ASR Basis

The ASR Basis is one of the finest phono-preamplifiers one can buy anywhere. Either MM or MC cartridges can be connected to the ASR Basis. In the standard configuration the ASR Basis is already equipped with built-in battery power supplies to eliminate AC network interference and distortions. The ASR Basis is delivered with a high-quality acrylic-glass case. The ASR Basis can be equipped with a separate ASR battery power supply as an optional extra. The acrylic glass can be ordered in various colours.

ASR_battery power supply

Silence and musicality in music reproduction.
incomparable improvement in musical enjoyment.
an ASR Emitter equipped with an ASR battery power supply –
the highest level of realism in musical playback.

2

The musical experience auditioning the ASR Emitter amplifier can be improved further by using the ASR battery power supply. The input stages of the ASR Emitter are supplied with pure current – free of any distortion from the power supply system.

The ASR Basis phono-preamplifier can also be equipped with an ASR battery power supply to improve its performance. Equipped with an ASR battery power supply, the ASR amplifiers have a natural timbre. The music is reproduced realistically, with a good tonal balance and allows one to enjoy the music rather than focusing on the technical details of music reproduction. The ASR battery power supply is the ultimate improvement that will be appreciated by the sophisticated listener.
